Invasive hybrid watermilfoil is expanding lakewide in the 'Jewel of NSP'

This extremely invasive species will cover the entire lake over time if not treated. To rid and protect the lake from this hybrid watermilfoil, the DNR approved the Silver Lake Improvement Association for a one-time, full lake treatment which comes with a cost of \$20,000.

Because Silver Lake is enjoyed by so many for recreational purposes, we hope to make this a community effort and Mac's Diner wants to help!

**Please join us at Mac's Diner on Monday, June 26th from 4-9PM
to help fund Silver Lake's first time, full lake treatment
of invasive hybrid watermilfoil.**
